For Immediate Release

## Watch live TV in-flight

Seattle, WA, April 28, 2008 - NAT Seattle Inc., a Cobham Avionics & Surveillance Company, is excited to announce the availability of in-flight live television viewing.

NAT Seattle's JetLAN airborne computer hosting specialized software from Satcom1 provides live television viewing over Internet Protocol (IPTV) while in-flight. A variety of content is available ranging from CNN to the major networks not limited by geographic region.

IPTV is just one of the value added benefits that the JetLAN line provides aircraft passengers. Currently available with the JetLAN is use of smart phones, internet access, e-mail, printer / fax support, and video teleconferencing available through a common Satcom and a single antenna. JetLAN airborne computers allow airlines, chartered and private planes to provide a variety of services that will keep passengers entertained and productive.

Those interested in learning more about this new feature, or any features of JetLAN airborne computers, can meet with a NAT Seattle representative at EBACE booth 1846 May 20-22 in Geneva, visit the website [www.natseattle.com](http://www.natseattle.com), or call the office at 888-655-3755.
