NAT Seattle & Satcom1's Partnership Enhances Iridium Features

SEATTLE, WA, May 1, 2007 — NAT Seattle announces the enhanced features available to Iridium users with the JetLAN airborne computer and the Satcom1 software package. Being able to manage data with a low bandwidth system is critical for many users. This package enables users to send / receive data from a PDA, cell phone or laptop.

Other Features Include:

- Wireless email to and from the aircraft directly from a cell phone or PDA
- Text Web Browsing
- Server Applications: Faxing, Printing, Presentations and File Sharing
- Robust Data Storage
- Full Support of Security Encryption Standards
- Built-In WIFI Access Point
- Facilitating Gatelink Connections
- Monitor and Manage Maintenance
