## NAT Seattle Announces ISO9000:2000 + AS9100B Registration

**SEATTLE, WA, July 16, 2007** — NAT Seattle, A Cobham Avionics and Surveillance Company, has completed the necessary requirements to become fully ISO9000:2000 + AS9100B registered. The procedures impact all aspects of the company from business development to engineering. NAT Seattle received its registration from QMI on June 27<sup>th</sup>, 2007.

ISO9000:2000 is the international quality standard developed by the International Organization for Standardization to provide a standards baseline for the companies of the world. By being ISO9000 registered, a company has written procedures based on eight quality principles to provide structure to business practices. The AS9100B accreditation applies to Aerospace companies. It ensures that aerospace companies meet the standards of ISO9000 as well as aerospace specific standards such as safety, airworthiness, product conformity and reliability.
